

## Gujarati Spot It Game

### Prep for the game:

Print out the game, can use regular paper or cardstock for more durability. Cut out the circles.

### Instructions:

There are many different versions of the game, but essentially, each card has only one match with the other cards. One way to play is: all the cards can go in the middle face down, with every player getting one card face up. Then turn the top card in the middle pile face up and the first person to find the match to their card gets to keep it and it becomes their new top card that they have to use to find matches. Keep flipping the top card until you run out and the person with the most cards in their hand wins.

The cards have most of the Gujarati consonant alphabet, except for સ ઝ  
ળ ળ ળ
